Chronicles of Religious Science, Volume II, January 1960-February 2012

The History of the Religious Science Movement

Marilyn Leo; Foreword by Dr. Roger Teel

Book Description:

Building on the history documented in *Chronicles of Religious Science Volume I*, this second volume opens with the transition of Ernest Holmes in 1960. Each chapter highlights the growth and decisions of the Church of Religious Science and Religious Science International as the organizations grew and eventually merged back into one whole in 2012. Based on interviews, quotes, meeting minutes and commentary, these two volumes capture the essence of Religious Science and preserve its history for future generations.

Ernest Holmes writes, "When, through intuition, faith finds its proper place under Divine Law, there are no limitations, and what are called miraculous results follow." The *Chronicles of Religious Science II* is one of those miraculous efforts. I offer deep gratitude to Marilyn Leo for capturing the essence and details of so many aspects of the life of Holmes and the Religious Science movement and honor the keen minds and huge hearts who worked tirelessly to bring it to you. Holmes also writes, "A thought of love is always healing."
