

# Paper Drone

Make and Fly Your Own Paper Drone!

Lee Hee-Woo

Learn the systematic principles and techniques of flight, and increase scientific logic. *Paper Drones* gathers eighteen excellently designed papers drones from nine different blueprints that readers can use to learn the principles of flying, powered by elastic band. Paper drones in this book can be easily detached without using scissors, and the pieces of planes can be assembled by using adhesive only. Kids will enjoy these super-flying, easy-to-make paper planes and also learn about drone history, drone types, and the forces, principles, and methods of flight.

**Lee Hee-Woo** is a graduate of the Air Force Academy and former F-5 fighter pilot. After much effort in developing the Air Force's T-50 aeroplane, he was discharged as a commodore in the Air Force. He is the CEO of the drone manufacturing company KEVA Drone Co. Ltd, a visiting professor at the Korea Aerospace Research Institute, and a director at the Chungnam National University General Military System Research Institute.
